

***FUSION*GUARD**

# **FUSIONGUARD**

**FUSIONGUARD®** is focused in the manufacturing of FTTX, Horizontal and vertical splice closures and offers some unique products to repair fibers in the field.

Our fiber optic closures are resistant to dust, UV and have great mechanical properties, we offer a **variety** of completely sealed closures (IP68).

A **FUSIONGUARD®** splice closure is **adaptable to any optical cable** and the installation method can be buried, in manholes, handholes, aerial & wall/pole.

888 227 1072

**FUSIONGUARD®** offers the only 1 to 12 fiber splice closure in the market that has **IP68 rating** that offers different coupling methods, fusion splicing, LC-SC-MTP adaptors in the same closure ideal for fiber repair or quick fiber installation, this product is suited for most common cables round, flat drop, among others.

**Which saves time and money  
in the field.**

## PLASTIC INJECTION MOLDING PLANT

Since 2014, our plant manufacturers various products through our **4 injection molding machines** that are incorporated into the different brands, such as splice closures, splice trays, fiber storage units, terminal boxes, plastic reels, plastic accessories used in our metal cabinets, cable markers and pole hardware.
