

ABOUT US

MEXFOSERV® offers a complete product line of **connectivity related products**. We offer top quality & best lead times in the industry that help our customers meet their fiber deployment targets enabling them the lowest total cost of ownership.

Since we are **vertically integrated** with our cable assembly, fiber optic cable, injection molding, and metal stamping factory **we can design and manufacture** almost **any application** while testing the performance in our own lab to ensure the product reliability and simulate the product endurance in the field.

HISTORY

The **MEXFOSERV®** brand was born in **2005** to provide high quality fiber optic cable assemblies with quick turnaround. As well as a full metal cabinet line.

In **2008** **MEXFOSERV®** build a state of the art clean room to increase the production capacity with 4 new fully automated production lines.

In **2018** The **MEXFOSERV®** cable assembly plant increased production capacity and build a second clean room to be able to produce large trunk cables for 5G applications.

FIBER OPTIC ASSEMBLY PLANTS

We currently have **3 state of the art productions areas** which cover an area of over 7000 sq. feet, and have an average output of **150 K fiber ends per month** for single fiber and **5K MPO terminations per month**.

Area 1 produces optical cable assemblies, attenuators, splitters & transceivers in a clean room Class 10000 ISO 7, **Our second area** is designed to produce large trunk cables, FTTA assemblies and long drop FTTX cables that are packaged on reels. among others. **Our third area** is where we manufacture our specialty products or highly customized products that include pad printing, low pressure molding capabilities among others.

REGULATORY COMPLIANCE

- RoHS
- ANSI/TIA-568-C.3-1
- GR-326-CORE
- GR-1221-CORE
- GR-1209-CORE
