FIBER OPTIC NETWORK SOLUTIONS
INSTALLATION MANUAL
FAST ACCESS JUMPER

GENERAL

This document is intended to provide a step-by-step guide for installing the product Fast Access Jumper.
The Fast Access Jumper is equipped with a Nylon Pulling Eye that enhances it´s pulling strength.
TABLE OF CONTENTS

PULLING EYE INSTALLATION

STEP 1

Slide the Pulling Eye over the
Fast Access Jumper

STEP 2

Hold the Pulling Eye with the
hand on the cable, tighten up the
Pulling Eye, and push it to the
side of the cable.

STEP 3

Continue moving forward to the
end of the cable.

STEP 4

When the metal cap reaches
the end of the Pulling Eye, tight it
to improve its performance.

PULLING EYE INSTALLATION

STEP 5

Insert a wire into the Anti-torsion component.

STEP 6

Ready for field installation.

## FAST ACCESS CONNECTOR

HOUSING ASSEMBLY

STEP 1

Remove the metal traction cap from the Fast Access Jumper

STEP 2

Align the Red mark on the Body with the Red mark on the bottom of the ferrule. To confirm that the assembly is correct, you should hear a "click" sound.
STEP 3

Align the Red mark on the Body with the Red mark on the Housing.

STEP 4

After adding the housing, make sure to clean the ferrule

STEP 5

Install the Dust Cap
